Flat Roofing Safety Infographic

>> HOW TO STAY SAFE ON ROOFS <<

SAFETY EQUIPMENT!

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Protect head, eyes, ears, hands, feet and other body parts

PERSONAL FALL ARREST SYSTEM (PFAS)

Stop falls with ABC: Anchor + Body support + Connection

FALL PROTECTION

In case someone slips, a mobile fall cart prevents tragedy

FALL RESTRAINT

Prevent falls with temporary guardrails, which are now required on low-slope as well as steep-slope roofs

RESPIRATORY PROTECTION

Protects against airborne risks, including silica

Training, OSHA certifications, surprise inspections, continual updates...and always use the right safety equipment!
