Picture This! Where's the Emergency Phone, Jack?

Hmm…This picture brings to mind the saying about not always being able to believe what one is reading. Many workers carry cell phones these days, but if you aren't among them and need to find a telephone to report an emergency, this scenario would certainly set your heart rate soaring. A phone jack without an emergency phone is about as useful as a fire engine that runs out of fuel on the way to a call. (WorkSafe Victoria, Australia)
