

Choices at Home and Safety on the Job – Picture This

What's wrong in this picture?

Slips, trips and falls are some of the most common types of workplace injuries. When your employees are working from home, their environment doesn't have the safety standards you have in place at the office. They're at risk of tripping over household objects like toys, slipping on water spilled from the dog's bowl, or even falling down the stairs.

Prevent falls down stairs by always turning on the lights and using a handrail when going up or down stairs. Avoid trying to carry too much – leave one hand free to catch yourself if you stumble.
