

# Drunk Driving Stats and Facts

## FACTS

1. The largest group at risk for drinking and driving are those who binge drink. This means they consume a large amount of alcohol in a short period of time, putting them at risk for harmful side effects. It takes roughly 30 minutes to two hours for alcohol to be absorbed into your bloodstream.
2. Any amount of alcohol in your bloodstream can impact your driving ability. The effects of alcohol abuse vary greatly, putting you at risk for causing an accident or highway injury.
3. When alcohol is in your system, it affects how quickly you're able to respond to different situations. Drinking slows your response time, which can increase the likelihood of an accident.
4. Heavy drinking affects your motor skills such as eye, hand and foot coordination. Without crucial coordination skills, you may be unable to avoid an impending harmful situation.
5. Alcohol, no matter how much or how little, can influence your concentration. Your attention span is dramatically reduced with drinking, which significantly increases the chance of an accident.
6. Your brain controls how you judge certain circumstances. When operating a motorized vehicle, your judgement skills play an important role in how you make decisions. Your judgement helps you stay alert and aware of surrounding conditions while driving.

## STATS

- Impairment is not reliant upon the type of alcohol consumed, rather the number of drinks over a certain period of time. Despite myths and misconceptions, coffee, a cold shower, or exercise will not make a person more sober; only time will.
- On average, a drunk driver will drive 80 times under the

influence before their first arrest.

- Every 51 minutes in America, someone is killed in a drunk driving crash. That equates to 27 people every day. Offer to be your parents' designated driver to ensure that everybody gets home safe. Sign up for Parents Ride Shotty.
- For drivers under 21, the U.S. has a No Tolerance policy that does not allow any alcohol to be in the blood system while behind the wheel. The consequences could include expensive fines, loss of license or jail.
- Someone is injured in a drunk driving incident every 120 seconds.
- In 2011, 9,878 people were victims of drunk drivers.
- Between 50 to 75% of the people who have had their licenses revoked due to driving under the influence drive illegally without their license.
- Traffic accidents are the leading cause of death for teens, and roughly 1/3 of these accidents involve alcohol or another substance.
- Since the early 1980s, alcohol-related traffic deaths per population have been cut in half with the greatest proportional declines among persons 16-20 years old.
- In 2010, of the fatalities among children ages 14 and younger, 17 percent occurred in alcohol impaired-driving crashes.
- Kids and teens who get involved with alcohol at a young age are 7 times more likely to be involved in an alcohol-related crash in their lives.
