Eye Protection — Seeing is Believing Infographic

Work related eye injuries affect more than 2500 workers in BC every year.

CHOOSE THE RIGHT PROTECTION FOR THE JOB:

- When working around particles, flying objects, or dust wear SAFETY GLASSES with side protection.
- * When working with chemicals, wear GOGGLES.
- Wear a FACE SHIELD over your safety glasses or goggles when the hazard is more severe.

Proper eye protection will decrease your chances of eye injury by 90%.
