Health Services Training Calendar

Our health services safety training aims to reduce accidents & injuries specific to the healthcare industry. Our network of health and safety professionals have extensive experience engineering controls, training, and hazard identification in order to ensure employees and employers alike stay safer and work more productively.

Healthcare workers face a number of serious safety and health hazards. They include bloodborne pathogens and biological hazards, potential chemical and drug exposures, waste anesthetic gas exposures, respiratory hazards, ergonomic hazards from lifting and repetitive tasks, laser hazards, workplace violence, hazards associated with laboratories, and radioactive material and x-ray hazards. One of the most effective ways to reduce workplace hazards and injuries is through a comprehensive, proactive safety and health management system.

Training topics also include those relevant to all industries that ensure safe work environments and healthy workers such as anti-harassment training and emergency response.

These materials educate, inform and inspire better workplaces for all companies. Download our OHS training calendar as selected by ASSE certified trainers.
