

Identify, Evaluate and Control Pictures This

IDENTIFY THE HAZARD

Spot the hazards, identify the triggers, and assess the consequences.

HAZARDS
What are the possible sources of injury?

High Voltage

Open Containers

Loose Parts

TRIGGERS
What would have to go wrong for an injury to occur?

Worker Tripping

Noise Overload

Yield Lifting

CONSEQUENCES
What type and severity of injury could result?

Broken Finger

Ankle Sprain

Head Injury

This step is the first phase in the series of six steps with a Risk Assessment, which is required by several standards. Risk Assessment asks employees to measure the worst danger of different tasks. Consider just one or every one for the Hazards and Consequences) and how likely it is for that injury to occur (the probability of the triggers, the combination of the time it takes to react, etc.
