

Mold and Mildew Awareness – Landscaping Infographic

The Key to Mold Control is Moisture Control

Mold... no one wants it in their home. Mold produces allergens and can cause health problems. Although mold is naturally found in the indoor environment, it won't grow without moisture.

Take steps to control mold and moisture indoors:

Reduce humidity: use exhaust fans or open windows in kitchens and bathrooms, and use air conditioners or dehumidifiers as needed.

Prevent condensation by reducing humidity, increasing ventilation, or raising the indoor air temperature.

Completely dry any damp or wet surfaces within 24-48 hours, and fix the source of the water problem or leak.
