

# Newsletter – July 2026

Download the July 2026 newsletter which highlights key strategies for strengthening workplace safety and engagement. Featured articles include *How to Deliver an Effective Safety Talk on Combustible Dust Hazards*, offering practical guidance for addressing a serious workplace risk, and *Why Safety Training Fades and How to Make the Message Stick*, which explores ways to improve knowledge retention. Readers will also discover why organizations should *Stop Training Generations Differently, Start Training Risk Differently* to better focus on hazard awareness and prevention. In addition, the newsletter introduces four new meeting kits designed to support safety discussions, shares lessons learned through the latest *Fatality Files*, and emphasizes the importance of *Mental Health Awareness in Safety Programs* as part of a comprehensive approach to worker well-being.
