OSHA Program Wizard: Confined Spaces

This confined space program identifies and evaluates potential hazards of work in confined spaces, and ensures the use of protective measures in these spaces so as to prevent injury or incident.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
