

OSHA Program Wizard: Fall Protection

This procedure provides employees the criteria for the recognition and control of fall hazards. It applies to all facilities and field operations where personnel could be exposed to fall hazards of 4 feet or greater.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
