OSHA Program Wizard: Hand and Power Tool Safety

This guideline provides safe procedures for the use of hand and power tools. This program applies to personnel who may be required to use hand or power tools for work activities.
The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
