OSHA Program Wizard: Hearing Conservation Program

Controlling noise exposure improves workplace safety, lowers absenteeism, and reduces medical costs. This Hearing Conservation Program is designed to reduce the exposure to occupational hearing impairment in your high noise areas.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
