

OSHA Program Wizard: Heat Illness Prevention Plan

This Heat Illness Prevention Plan (HIPP) is designed to assure the safety of company employees who work in outdoor areas of employment or on job tasks where the environmental risk factors for heat illness are present, and are at risk for developing heat illnesses if they do not protect themselves appropriately.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
