

OSHA Program Wizard: Hot Work

This program provides guidelines and requirements for conducting welding and cutting operations. This procedure applies to employees conducting welding and cutting operations. It does not apply to work on or about processes of highly hazardous chemicals or work in confined spaces.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
