OSHA Program Wizard: Incident Investigation

This program outlines the procedure for reporting accidents and incidents and to provide information that will ensure effective investigations of work related incidents and injuries which will promote the reduction or elimination of future incidents.
The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
