

OSHA Program Wizard: Personal Protective Equipment

This Personal Protective Equipment (PPE) Program provides a consistent approach to managing workplace hazards when personal protective equipment is necessary to maintain employee safety.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
