

OSHA Program Wizard: Powered Industrial Truck Safety

This program protects the health and safety of Powered Industrial Truck (PIT) operators and pedestrians. PITs include forklifts, platform lift trucks, motorized hand trucks, and other specialized industrial trucks powered by electric or internal combustion engines.

The purpose of this safety program is to aid business owners with their Federal OSHA compliance efforts. Each business is unique and this wizard guides you through the required customization. As the program is customized, remember to only include words, sections, concepts, procedures, etc. that are relevant to the operations. The purpose of any written safety program is to provide a clear and consistent plan for addressing safety in a particular area of focus.
