

Tractor Hand Signals

Hand signals to effectively communicate with tractor operators.

Tractor Safety

This video outlines all the basic skills to safely operate a tractor.

Active Shooter Awareness Video – Helping Prevent Tragedy – (9 min)

Incidents involving active shooters continue to be in the news. These acts of violence are becoming more commonplace in today's society, and although your chances of being a victim of an active shooter incident are minuscule, it is important your organization and your associates plan and be prepared for such an incident. Active shooters can strike where we live, where we work, where we study, where we shop or any other environment. No business or institution is immune to the potential of an active shooter attack. The purpose of this informational training is not to alarm viewers, but to enlighten them regarding some of the elements of an active shooter scenario and what they should do to be prepared to deal with such an act.

Back Safety- The Basics – (11 min) Spanish

Back injuries caused by improper lifting are the most common disabling injuries in the workplace. A person can injure their back in virtually any type of occupation, often to the point they can no longer work in their chosen field, along with having a devastating impact on their overall quality of life. Many of the causes of back injury can be prevented by teaching employees how the back operates and the basics of proper lifting techniques. This video does just that. Great for new or experienced employees.

BBP Know The Risk

As the title implies, this is an extremely comprehensive program relating to Bloodborne Pathogens. This program covers all aspects of an EXPOSURE CONTROL PLAN, information relating to BBP diseases, including Hepatitis B, C, and HIV, as well as modes of transmission, PPE and acceptable work practices, emergency procedures, and recordkeeping requirements. Dr. Jeffery Kahn, Liver Transplant Surgeon from the University of Southern California discusses the different types of viruses and Bloodborne Pathogens in general. Excellent program for both medical and industrial applications.

Office Ergonomics – Adjusting Your Workstation – (14 min) Spanish

This unique approach to Ergonomics training, begins by asking each viewer to select what area of their body, if any, is experiencing pain or discomfort. They are shown common postures that can cause or contribute to the conditions. The viewer is then lead through a comprehensive and specific method of adjusting a workstation to maximize neutral postures and minimize pain, discomfort and strain. This program also points out the multitude of other factors outside of the workplace that can contribute to musculo-skeletal disorders. This encourages viewers to take steps to adopt neutral postures in all of their activities.

Office Safety Basics

Designed to raise awareness of safety hazards in an office environment. This video focuses on the most common hazards found in an office. Video discusses basic ergonomics, ladders, office equipment, slips and falls, safe lifting, fire prevention and more.

Hazard Communications – (17 min)

In today's litigious society, we begin to take cautions, warnings and disclaimers from manufacturers' with a touch of skepticism or disregard. When it comes to hazardous chemicals in the work place, words, colors and symbols mean something. Not only is it your workers' right, it is their responsibility to know what they mean. This program will teach your employees to recognize and understand the different means of communication used to identify hazardous chemicals including the United Nation's new Globally Harmonized System. The training program will educate your workers on the physical characteristics and chemical properties communicated in the material safety data sheets and on the container labels enabling them to make proper decisions concerning the safe use handling and storage of the substances. The program covers the purpose and role of hazard communication, the different classification of chemicals and their hazards, the primary forms of communication, and best practices and procedures to ensure their safety and health. Chemicals are an intricate and valuable

part of our life. When respected and handled properly, they pose minimum risk our safety and health. Knowledge is a valuable safety tool. Not only is it your workers' right to know, it is their responsibility to use it to protect their safety and that of their co-workers.

Roll-Off trucks are specialized equipment that require specialized techniques and procedures to operate safely.

Solid Waste: Commercial Pickup – Spanish

Roll-Off trucks are specialized equipment that require specialized techniques and procedures to operate safely.

Solid Waste: Lockout Tagout – (13 min)

In most industries it is as simple as turning off the power and installing a lock to prevent the power from being turned back on. In the solid waste industry the purpose is the same, protecting employees, but the energy sources we need to control aren't usually controlled by just a circuit breaker. This program takes a detailed look about how to properly lock and block trash hauling vehicles during maintenance and clean out operations.
