

Schoolbus Safety – Distracted Driving Meeting Kit

WHAT'S AT STAKE

Distracted driving is a serious threat to safety, especially for school bus drivers entrusted with the well-being of children. A single moment of inattention can lead to devastating consequences: collisions with other vehicles, pedestrians, or cyclists, resulting in serious injuries, fatalities, and lasting trauma for all involved. Beyond the immediate physical harm, distracted driving can lead to legal repercussions, financial burdens, and damage to professional reputations. Maintaining complete focus on the road is not merely a suggestion; it's a non-negotiable responsibility that we must uphold to protect the students in our care and ensure the safety of everyone on the road.

WHAT'S THE DANGER

Distracted driving isn't just about texting while driving. It covers any activity that diverts your attention from the primary task of driving. This includes visual distractions (taking your eyes off the road), manual distractions (taking your hands off the wheel), and cognitive distractions (taking your mind off driving). Examples include using cellphones (talking, texting, browsing), eating or drinking, adjusting the radio or climate controls, interacting with passengers, grooming, and even daydreaming. These distractions can significantly impair a driver's reaction time, judgment, and ability to maintain proper control of the bus.

The Impact on Driving Performance: When a driver is distracted, their ability to perceive and react to hazards is significantly reduced. They may fail to notice important visual cues, such as brake lights, traffic signals, or pedestrians crossing the street. Their reaction time slows down, making it harder to avoid

collisions. Their ability to maintain a consistent speed, stay in their lane, and maintain a safe following distance is also compromised. This combination of factors dramatically increases the risk of accidents.

HOW TO PROTECT YOURSELF

Preventing distracted driving is about making a conscious choice to prioritize safety every time you're behind the wheel. It's about developing good habits and recognizing situations that can lead to distractions.

Eliminate Mobile Device Use – Create a “No Phone Zone”:

This is non-negotiable. Your phone should be completely out of sight and reach while you're driving. Turn it off or silence notifications to eliminate the temptation to check it. Store it out of reach, such as in the glove compartment or a bag, where you can't easily access it. Inform family and friends that you won't be able to answer calls or texts while driving. If your phone has a “Do Not Disturb While Driving” feature, enable it to automatically silence notifications and send automatic replies.

Avoid Eating, Drinking, and Other In-Vehicle Activities – Focus on Driving:

Anything that takes your hands off the wheel or your eyes off the road is a distraction. Eat and drink before or after your route, not while driving. Avoid grooming or other personal tasks while operating the bus. Ensure that any loose items in the bus are secured so they don't roll around and become distractions. Before starting your route, pre-set your mirrors, climate controls, and radio stations to minimize the need for adjustments while driving.

Manage Interactions with Students Effectively – Maintain a Safe Environment:

While some interaction with students is unavoidable, it's important to manage it effectively to minimize distractions. Establish clear expectations for student behavior on the bus to

reduce disruptions. If you need to speak with a student, keep the conversation brief and focus on safety or bus-related issues. Avoid turning around to address students. If a situation requires more attention, pull over to a safe location before addressing it. If your bus has a PA system, use it for general announcements or instructions to students.

Pre-Trip Preparation and Planning – Be Prepared and Organized:

Proper preparation can prevent many in-drive distractions. Plan your route in advance and be aware of potential traffic conditions. Organize any necessary paperwork beforehand so you don't have to search for it while driving. Check weather conditions and adjust your route or schedule if needed. Allow ample time for your route; rushing increases the likelihood of becoming distracted.

Focus on Driving and Practice Defensive Driving – Be Proactive and Alert:

Maintaining focus and using defensive driving skills are crucial for preventing accidents. Regularly scan the road ahead for potential hazards, such as pedestrians, cyclists, and other vehicles. Check your mirrors frequently, ideally every 5-8 seconds, to maintain awareness of your surroundings. Maintain situational awareness by being constantly aware of the traffic flow, weather conditions, and road conditions. Anticipate potential hazards and be prepared to react safely.

Manage Fatigue and Stress – Prioritize Rest and Well-being:

Fatigue and stress can significantly impair your ability to focus and increase your susceptibility to distractions. Ensure you get adequate rest before your shift. Manage stress effectively through techniques such as deep breathing or mindfulness. If you feel tired or stressed while driving, pull over to a safe location and take a short break. If you are consistently experiencing fatigue or stress, communicate with your supervisor.

FINAL WORD

The good news is, distracted driving is something we can control. We're in charge of our actions. By using these tips and staying focused, we can prevent accidents and keep our kids safe. It's all about being proactive and making smart decisions.
