Tech & Data-Centers: High Noise, Heat, and Site Access Hazards Fatality File

Worker Killed at Data Center Construction Site – Medina County, Texas

A 28-year-old construction worker was fatally struck by an articulating truck at the future site of a large data center project in Medina County, Texas. Safety officials confirmed the employee was pronounced dead at the scene after the collision occurred during morning operations. Construction at the site was halted pending a full investigation by local authorities, and both the main contractor and infrastructure owner expressed condolences and cooperated with investigators as they reviewed the circumstances of the fatal incident.
