## SAFETY TIPS FOR TOW TRUCK DRIVERS

PRESENTED BY CHERGEY INSURANCE

- BE READY FOR THE ROAD**  
Before you hit the road make sure that you and your tow truck are properly ready to handle the task at hand. Inspect the vehicle and equipment so you know that everything is in working order.
- DRIVE SAFELY**  
No matter the severity of the situation, it's important to stay diligent on the road. Always stay within the speed limit and keep your distance from other vehicles.
- CONTROL THE SITUATION**  
Once you arrive to your destination take control of the situation by turning on your safety lights, laying down cones, using flares and markers and getting people out of harms way. When towing away from the scene make sure the area is clear.
- BE SEEN BY THE PUBLIC**  
Wear the appropriate uniform to indicate to the public that you are a tow truck driver. Use flashing lights and reflectors to indicate your presence.
- DON'T OVERWORK IT**  
Only do what you and your tow truck can handle. Never tow a vehicle that is over your tow truck's capacity.
